## EDUCATION

### I.M.S. Engineering College

Computer Science and Design Bachelor of Technology

Ghaziabad, India

December 2021 - 2025

### H.S.S. Public School

C.B.S.E. 12<sup>th</sup>

Percentage: 80%

Hasanpur, India

2020 - 2021

## EXPERIENCE

### Appinventiv Technologies Pvt. Ltd.

React Developer Intern

Noida, India

March 2025 – Present

- Built scalable applications including a core **HRMS portal** (serving 500+ employees) and a **social media platform** with login/sign-up, password recovery, feed, and post sharing, implementing secure **authentication, dynamic routing, and client-side validation**.
- Improved performance by 20% through efficient state management with **Redux Toolkit** and by creating reusable, responsive UI components using **React.js** and **Tailwind CSS**.
- Delivered features in an **Agile/Scrum** environment using **Next.js**, contributing to code quality via peer reviews and consistently completing work ahead of sprint deadlines.

### VDT Pipeline Integrity Solutions Pvt. Ltd.

Data Science & Python Software Development Intern

Noida, India

Feb 2025 – March 2025

- Optimized defect detection algorithms for pipeline inspection data, boosting identification accuracy by 50% (from 40% to 60%) through advanced noise reduction and **feature classification**.
- Architected and deployed **Linux shell scripts** to automate data manipulation, replacing slower **Python** processes to significantly accelerate the processing of large-scale datasets.
- Re-engineered the core processing of a **desktop application** by eliminating redundant thread pools, creating a lightweight solution with markedly improved data loading and processing speeds.

## SKILLS

|                    |                                                          |
|--------------------|----------------------------------------------------------|
| Programming:       | C++, Data Structures & Algorithms, Python                |
| Frontend:          | JavaScript (ES6+), React.js, Redux Toolkit, Tailwind CSS |
| Backend/Data:      | Python, Matplotlib                                       |
| Tools / Platforms: | Git, GitHub, VS Code, Linux, PyQt6                       |

## PROJECTS / OPEN-SOURCE

### Employee Management System (Admin Portal) | Live Link

**React.js, Redux, Tailwind CSS**

- Developed an **HRMS Admin Portal** with modules for Leave, Attendance, Employee Setup, Dashboard, Reports, Loans, and DSR tracking.
- Built **scalable, reusable components** that improved UI performance by 25% and ensured 99% cross-browser compatibility.

### Image Steganography Application | GitHub Link

**Python, Tkinter, PIL**

- Built a **desktop application** to encode/decode hidden messages in images with an intuitive GUI supporting **PNG, JPEG, JPG**.
- Applied principles of **steganography** to create a secure, self-contained solution for data concealment in image files.

## HONORS & AWARDS

- Secured **2nd Place (Silver Medal)**, **Code War** at VIBGYOR, IMSEC Ghaziabad (2024).
- Secured **2nd Place (Silver Medal)**, **Tech Riddle**, IMSEC Ghaziabad (2023).
